RTTY CONTESTING

TO BE COVERED

- Getting started on RTTY
- Getting started in RTTY Contesting
- Additions

GETTING STARTED ON RTTY - Equipment

Radio Capability

- **Receiver**

- **External Speaker Connection, or**
- **Independent Audio Output**

- **Transmitter**

- **Audio Frequency Shift Keying (AFSK)**
 - **Independent Audio Input (preferred), and/or**
 - **Microphone Input**
- **Frequency Shift Keying (FSK) Input (not a necessity)**

GETTING STARTED ON RTTY - Equipment (cont.)

Computer

- **Sound Card**
 - **Line In (preferred), or**
 - **Microphone Input**
 - **AFSK**
 - **Line Out (preferred), or**
 - **Speaker Output**
 - **FSK**
 - **Serial Communication Port or USB to Serial Adapter**
- **Software (RTTY)**
 - **Compatible with Computer**

GETTING STARTED ON RTTY - Equipment

- **Interconnection Between Receiver, Transmitter and Computer**
 - **Comprehensive Source of Information for Connecting Radios to Computers Can Be Found at: <http://www.qsl.net/wm2u/interface.html> and is titled “Understanding Soundcard Interfacing”**

Understanding Soundcard Interfacing

by Ernie Mills, W2U. <http://www.qsl.net/wm2u>

Please print this article and use it as a hand out at Club talks and lectures
Interface (Russian) tnx to Andrey Otroshenko, RA3DOA

This page is an attempt to correlate the interfacing schemes for various *Radio models*, and *Sound Card* configurations. Since 26th December 1998, when the sound card version of *PSK31* was first introduced to the Ham community, and after much dialog, experimentation and confusion, an interfacing pattern slowly emerged. I feel that an *understanding* of this pattern is valuable and can save you a lot of time and grief. Please note that each circuit references various letters which will correlate with the Radio pin-outs on the various popup tables available. Just click the manufactures button below, pick your radio and read off the hook-up points.

Kenwood | Yaesu | ICOM | Alinco | ...more

I Urgently need other Radio hook-up info.and corrections. Please e-mail me, W2U, or submit this Form for it's inclusion onto this page.

You have a *Kenwood Radio* and your hookup information is not here! Don't panic! Goto the *Kenwood*. Amateur Radio site, then to the "Jump To" pull down menu and... hey presto! If it is not on this list, it was never made.

If you can't find it here try this great *TNC to Radio page; Hook-Up Magic*

Ok! Ok! so you prefer to buy (that's a dirty three letter word) a ready made Computer to Radio Interface. Check out this nice package by N1ZZ and K1UHF. They call it the *RIGblaster*

Wait!!! are you hooking up a fully computer controlled Radio? One with a virtual consol? The *Kachina, Pegasus* or whatever? Hey! first read *Georges Notes*

STOP!!! If you are a *FT1000MP* owner, look no further. *Doug McCann, VA3CR* has a web page dedicated solely to that fine machine. This great site is a one stop information authority and missing it will be your loss. You are warned :) Check out <http://www.va3cr.net/>.

Thomas Giella, KN4LF, has also a great web site showing hookup information for the *FT1000MP Mk5*. Check it put at ~ <http://www.kn4lf.com/kn4lf10.htm>

Ok, Almost there, but before we get into it, please read this email I received off *Jack, K8PET* if you are thinking of interfacing to a *LapTop* computer.

First off, *keep it as simple* as you can. This circuit shows a single connection between the Radio Audio Output and The Sound card LINE IN, and a simple 100:1 attenuated connection between the Radio Aux. Mic IN and the Sound Card LINE OUT.

- [Great Hookup Site](#)
- [KM1Z Fran](#)
- [Hook-it-up](#)
- [W5BBR Bill](#)
- [RIGblaster](#)
- [SignalLink](#)
- [KC7DH Chuck](#)
- [K4ABT Buck](#)
- [IMD Meter](#)
- [PSK Meter](#)

Oh! before we start a little word on the *component abbreviation* used on these diagrams. Since the decimal point was not showing up too well in cases like 4.7k ohm I adopted the *European* system which uses the 'k' as the decimal point. So the 4.7k ohm now will be marked as 4k7 ohm.

RTTY CONTESTING - Getting Started

Equipment

- **Receive Filters (400 Hz - XTAL or DSP)**
- **Computer Control (Computer Aided Tuning - CAT)**
- **Radio w/ Readily Programmable Memories**
- **Transmitter Able to Maintain Power Level During RTTY Transmission - 100 % Duty Cycle**
- **SO2R Helps**
- **RTTY S/W Compatible w/ Contest Logging S/W**

RTTY CONTESTING - Contests
