

TR log live linux quick start

Kevin E. Schmidt, W9CF
6510 S. Roosevelt St.
Tempe, AZ 85283 USA

- Double click on the “Small trlog window” icon on the desktop.
- In the xterm window that pops up, type

`trlog`

- You should see the familiar DOS trlog prompt screens. Follow the directions as in trlog.
- To get a quick feel of the program, type in your call, choose CQWW, and answer yes to the simulator question. This will use the soundcard for sound output. There is a volume control on the bottom bar.
- 73 and good luck.
